Height: 4 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 4b

Group/Class: Floribunda Rose

Description:

A scrumptious new rose color that captures the hues of ripe pumpkins lying in the field in fall; fragrant carmel orange and copper blooms form perfectly in cluster atop deep green glossy leaves; very good disease resistance and a multiple bloomer

Ornamental Features

Pumpkin Patch Rose is bathed in stunning fragrant double harvest gold recurved flowers with orange overtones and coppery-bronze centers at the ends of the branches from mid spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Pumpkin Patch Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Pumpkin Patch Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Pumpkin Patch Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
