Height: 12 inches

Spread: 12 inches

Spacing: 8 inches

Sunlight: ◐ ●

Hardiness Zone: 6a

Other Names: Snake's Beard

**Description:**

This slowly spreading dwarf forms clumps of narrow dark-green foliage; it has bell-shaped, pale lilac to white flowers in summer, followed by bright, sky-blue berries; striking when massed along borders; not actually a grass but closely related to lilies

**Ornamental Features**

Mondo Grass features dainty spikes of lilac purple bell-shaped flowers rising above the foliage from mid to late summer. Its attractive grassy leaves remain dark green in color throughout the year. It produces sky blue berries from early to mid fall.

**Landscape Attributes**

Mondo Grass is a dense herbaceous evergreen perennial grass with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Mondo Grass is recommended for the following landscape applications;

1232 Canal Street
New Smyrna Beach, FL 32168
Phone: 386-428-7298

**Planting & Growing**

Mondo Grass will grow to be about 12 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This species is not originally from North America. It can be propagated by division.

Mondo Grass is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
